Student Demographics

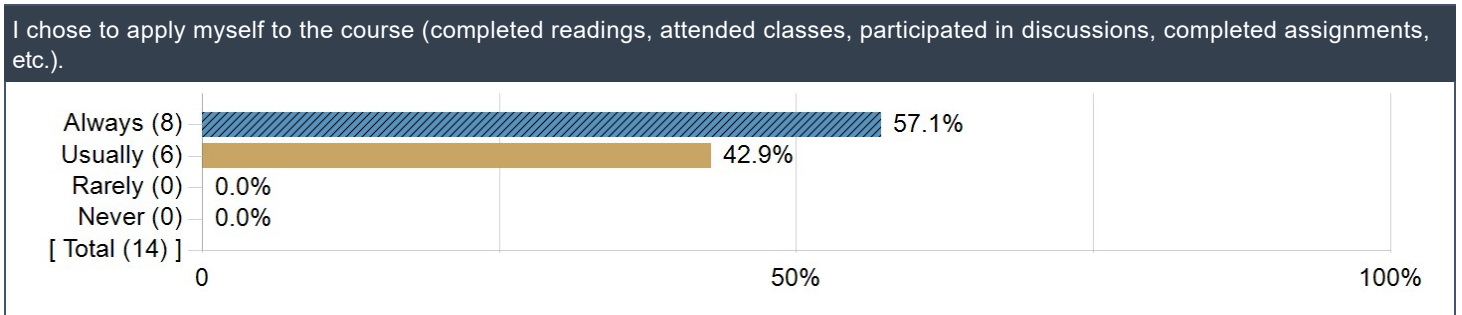

Why did you enroll in this course?

Please explain:

Comments
Core curriculum

I chose to apply myself to the course (completed readings, attended classes, participated in discussions, completed assignments, etc.).

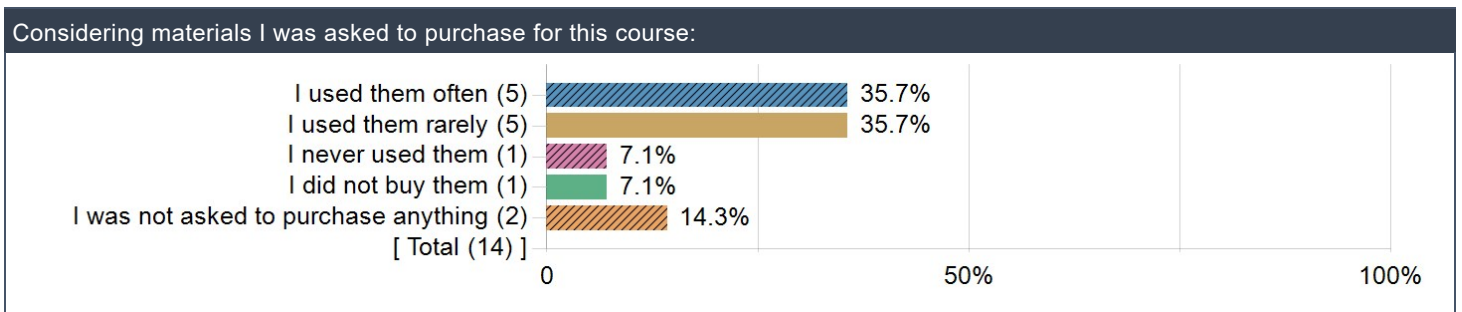

Please explain:

Comments
So much fun that way!

Course Materials

Considering materials I was asked to purchase for this course:

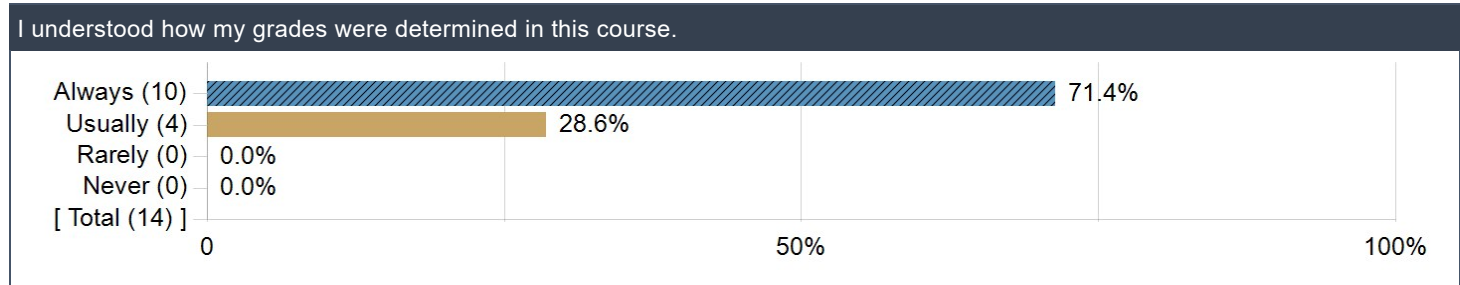

Please explain:

Comments
The textbook was a nice to have as a point of reference, but I didn't get much value from reading the chapters. I found the lectures were more than sufficient to explain the concepts.
Found free copies
The book is good and I referred to it. I mainly referred to it for solving chapter problems. Due to time constraints, (kids, full-time job, PMBA classes, self-study) could not explore it more.

Grades

I understood how my grades were determined in this course.

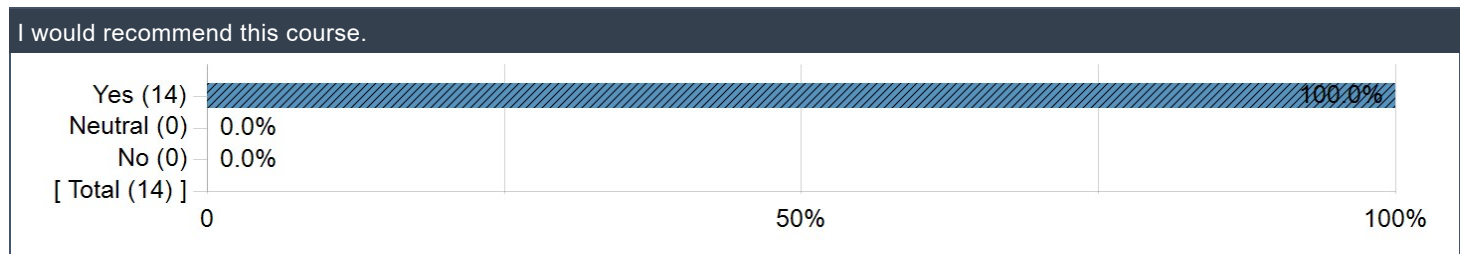

Please explain:

Comments
Understanding the curve is always a challenge, but one effort to help students succeed would be to provide more content for grading. All that are graded are Quizzes, Case Paper, and a final. Please consider having more assignments to help spread the weight of quizzes and the final for an overall course grade.
Super clear from the past quizzes and the objective evaluation

Recommend Course & Instructor

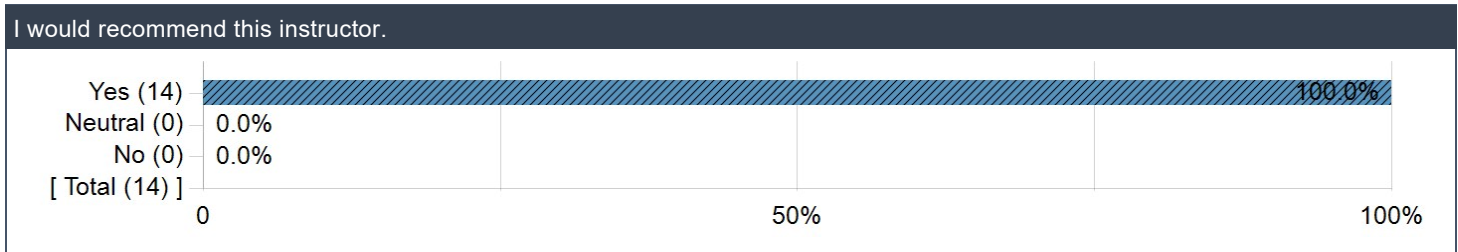

I would recommend this course.

Please explain:

Comments
I'm not necessarily a big finance person, but Professor Heath did a great job of making the material interesting and relevant.
Best class I've had so far in the program. The course was well structured, classes taught to objectives, grading was unambiguous, overall a success. My first experience in a finance class during my undergrad was awful, so needless to say, I wasn't excited about taking this course. However, the instructor did a great job organizing topics and making the class interesting, relevant (great current day examples), and fun.
Loved the content of this class. Very applicable in life.
My favorite course of the entire program!
If you want to know how any corporate company and the financial markets work, this is the course for you.
Good class content.

I would recommend this instructor.

Comments
Davidson Heath is one of my favorite professors I have had in this program. His lectures were engaging. He broke complex concepts down into extremely simple terms, while adding a side of humor that kept us laughing. He was also flexible with his students, and went out of his way to ensure his students success.
Davidson was awesome. Best professor in the program to-date. He's clearly knowledgeable about topics, passionate, and makes kept classes lively with well-timed jokes and audience participation.
Fantastic enthusiasm and ability to simplify complex concepts in understandable ways.
Davidson is humorous, engaging, but also technically proficient in the topics. This was my favorite course of my MBA.
Most engaging professor I've had in the program!
Davidson, thank you for your direct teaching. You cut the fat and helped us to know what was important and what wasn't. Please teach more than just 1 course.
Probably my favorite instructors in the program so far. He made the subject very interesting by relating it to relevant real world subjects. His Bay Street and Wall Street experience made his teaching methods all the more relevant.
If you want to know how any corporate company and the financial markets work, this is the instructor for you! I dare you to find someone better.
Best instructor I have had so far in my 1.33 years of the PMBA program. Able to keep class engaged in every session through use of real life examples/current events, humor, and not moving too slowly.
David Heath is a very structured professor, exploiting all resources for the students. He replied emails quickly, arranged one on one on short notices, made lecture recording available, allowed zoom class (it helped me when i had COVID), shared interesting articles and explained those in class.
Best prof I've ever had, undergrad or grad.

Asking Questions and Discussing Views

I felt comfortable asking questions and openly expressing and discussing my views in this course.

Which of these contributed to your answer?

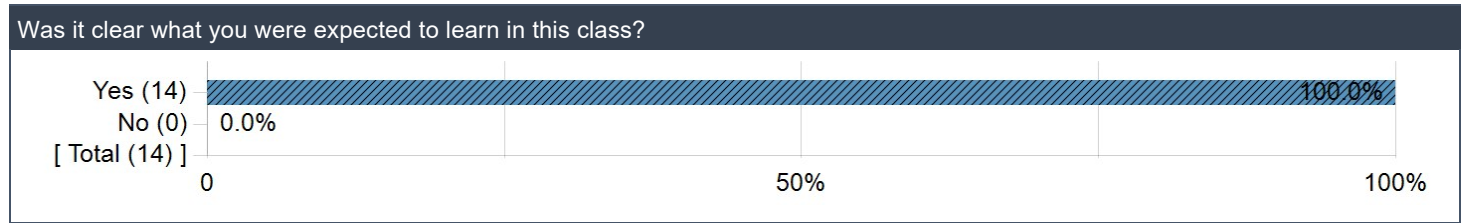

Please explain:

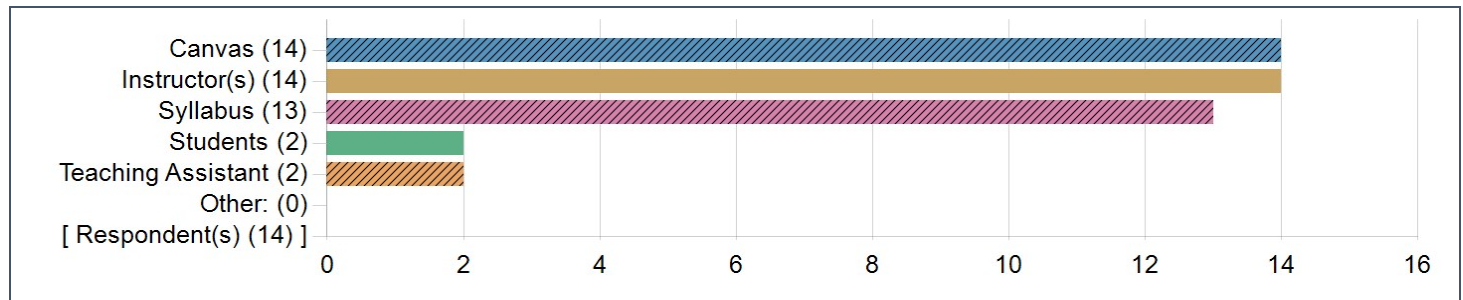

Comments
 Would like to add the technical assistant who facilitated zoom classes, a very polite and attentive technical assistant.

Learning Objectives

Was it clear what you were expected to learn in this class?

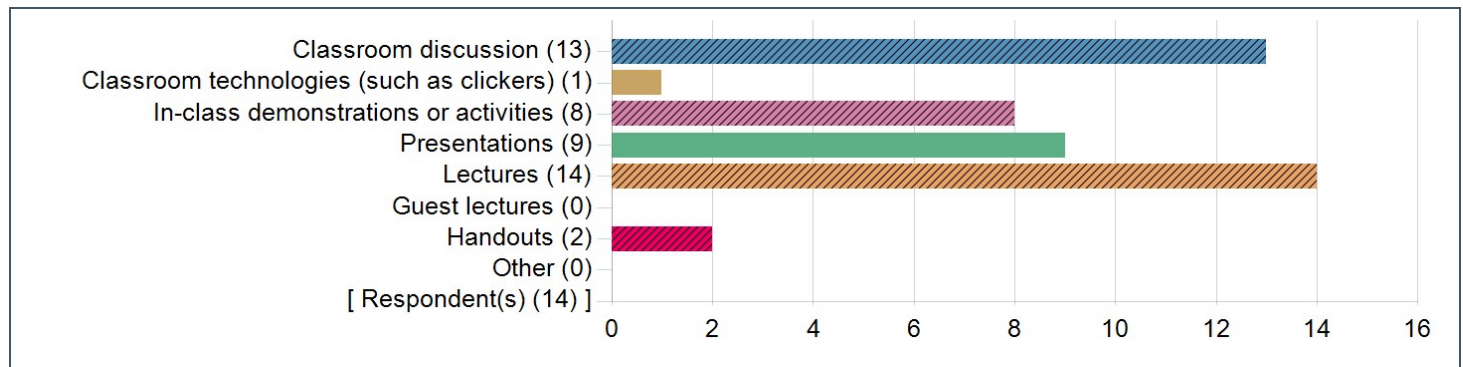

If yes, how did you know this?

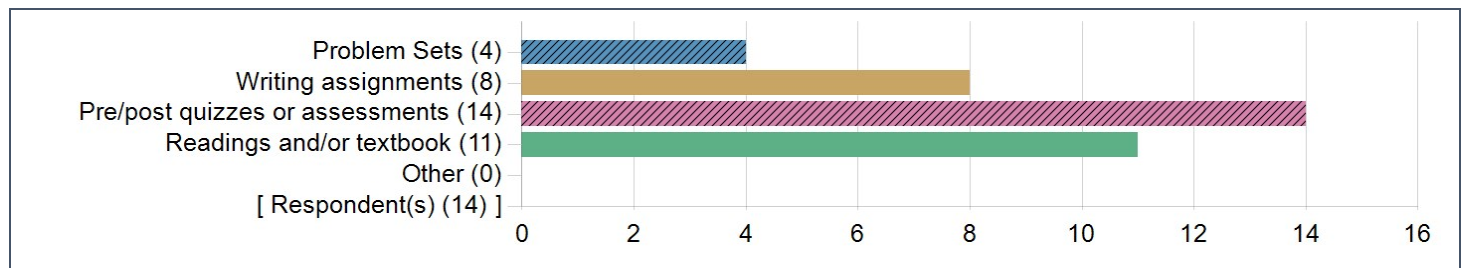

Which of these were used in the course and helped you learn?
